Delivering High Availability & Security for Mission-Critical Network Applications

Through best-of-breed network appliances and support, consulting & services around network infrastructure, and in-depth training classes, Milestone offers solutions for your mission-critical systems. When you need network security, optimized application delivery, and network acceleration, call Milestone Systems, Inc.

Network Appliances and Support

High availability on your entire enterprise (VPN, cloud apps, customer transactions) is essential. Our core expertise, experience, and product offerings deliver the right solutions when and where you need them for security, app delivery, and acceleration. See a list of our technology partners at www.milestonesystems.com/products

Milestone integrates the technology solution from beginning to end: network analysis, solution recommendation, installation & integration, training, and tech support. Read more about our Support Services at www.milestonesystems.com/services

Project Consulting

When you need specialty knowledge to design and implement a network security or acceleration project, count on Milestone Systems to provide the thought leadership, project management skills and subject-matter expert engineers to get the project done correctly and on time. Find more information on Milestone Consulting at www.milestonesystems.com/services/professional

Training

Milestone Systems offers in-depth training courses that cover the technical and functional aspects of the network appliances we sell & support -- including installation, integration, maintenance, and optimization. Classes are taught by subject-matter expert engineers with real-world experience, in a *stay-awake format* that includes classroom lecture, hands-on lab exercises, and discussion. See our current class schedule at www.milestonesystems.com/training
