"Real world examples are the most benefit. Thank you for adding as many as you did. It doesn't get any better than this!"

--R.B., Consultant

This was one of the best classes I've taken. Material was very good and to the point. The instructor was extremely knowledgeable and had lots of real world experiences to help us understand the importance of the topics. I was very pleased with the class.

-- Randy K. (commenting on an F5 BIG-IP class)

The in-depth knowledge you'll gain from Milestone technical training courses will have *immediate and positive impact* on your daily work.

Designed for network architects, administrators, and engineers, our training classes are taught by Milestone CISSP engineer-instructors. They are certified by Blue Coat, F5, IronPort, and Juniper -- and known for "going beyond the manual" with many real-world examples. Instruction methods include a *stay-awake combination* of lecture, discussion, and hands-on labs. Class size is limited so that everyone gets his/her questions discussed and answered.

Courses are conducted at our Training Facility in suburban Minneapolis, in selected major cities, or at clients' sites. Find our current class schedule at www.milestonesystems.com/training.

Milestone is an **Authorized Training Center** for:

- **F5** Networks Application Delivery Controllers
- **IronPort** Systems email security appliances
- **Blue Coat** proxy devices
- **Juniper** routers, switches, JUNOS, firewalls, VPN's and more
